RESEARCH INTERESTS	Interactive data analytics, visualization, integration systems.	
EDUCATION	University of Michigan , Ann Arbor, MI, USA Ph.D., Computer Science and Engineering <ul style="list-style-type: none">• Advisor: Prof. Michael Cafarella and Prof. H. V. Jagadish• Dissertation: Democratizing Self-Service Data Preparation through Example Guided Program Synthesis	Aug. 2014 - May 2020
	Purdue University , West Lafayette, IN, USA B.S. in Computer Science, Mathematics	Aug. 2011 - May 2014
	Tianjin University , Tianjin, China Electronic Information Science	Aug. 2009 - Jul. 2011
PROFESSIONAL EXPERIENCE	TikTok , Mountain View, CA <i>Senior Software Engineer</i> Query Engine Optimizations	Jul 2020 - Now
	Microsoft Research , Redmond, WA <i>Research Intern</i> (Mentored by Yeye He) Designed and implemented a system (like the seminal FlashFill system) recommending string data transformation programs which standardize or normalize regular-expression-like data patterns for a given set of string data (like phone numbers, or dates) with heterogeneous data patterns. Unlike most existing systems, which synthesize programs in real time, the recommended programs in our system are learned offline from a large corpus of web data and of higher quality.	Feb 2019 - May 2019
	Trifacta , San Francisco, CA <i>Software Engineering Intern</i> (Mentored by Sean Kandel, Michael Minar, and Joe Hellerstein) Designed and implemented CLX , an interactive data cleaning system. CLX 1) automatically identifies regular-expression-like data patterns for a given set of string data with heterogeneous data patterns for non-expert users to understand, and 2) suggests pattern-based transformation programs to unify various data patterns. The work was integrated to Trifacta Cloud Wrangler as a main feature in Aug 2018 and available at https://cloud.trifacta.com/ .	May 2017 - Sep. 2017
